

RIT*: Riemannian Informed Trees for Faster Motion Planning

(a) Euclidean Informed Set ($\mathcal{I}_E$)

$\mathcal{I}_E$ — Euclidean informed set

(b) Riemannian Informed Trees (RIT*)

$\mathcal{I}_R \subset \mathcal{I}_E$

— $\mathcal{I}_E$ (Euclidean — too large) — $\mathcal{I}_R$ (Riemannian — tight) — Euclidean tree — CARM tree — Euclidean path — Our path (CARM)
